Mumbai, India — +91-8451968851 — prasadsahil06@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#) — [LeetCode](#)

Professional Summary

Full-stack engineer with **2+ years of professional experience** building a **production B2B SaaS platform**, progressing from Web Developer to Backend SDE within the same organisation in 6 months. Specialises in **scalable Java/Spring Boot microservices** and event-driven systems using **Kafka, Redis, and AWS**. Shipped features across complex multi-module systems and delivered a **production third-party integration adopted by real clients**. Strong foundations in **TDD, system design (LLD/HLD), and Agile delivery**. Looking to bring backend depth and end-to-end ownership to a product-driven engineering team.

Technical Skills

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)

Architecture: Microservices, Event-Driven Architecture, Distributed Systems, System Design (LLD/HLD), OOP

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Messaging: Apache Kafka

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, GitHub Actions (CI/CD)

Testing: JUnit, Mockito, Test-Driven Development (TDD)

Professional Experience

Software Development Engineer (Backend)

Nov 2023 – Present

Crescent Engineering and Consulting, Navi Mumbai — B2B SaaS ERP Platform

- Delivered backend features across **five core product modules** — Inventory, Billing, Purchase, Production, and Sales CRM — designing domain-driven service boundaries, shared Kafka event contracts, and transactional consistency across PostgreSQL for a multi-tenant SaaS platform.
- Designed and built a **production Tally integration plugin** connecting the platform's Billing module with **Tally Prime** via XML/HTTP API, enabling bi-directional sync of invoices, payments, and ledger entries; eliminated manual data entry for clients and directly contributed to product adoption.
- Reduced **API latency by 45%** by introducing Redis caching and asynchronous request processing, directly improving SLA compliance and end-user experience.
- Improved **database query performance by 50%** through targeted indexing, query rewriting, and connection pool tuning across PostgreSQL and MySQL.
- Migrated tightly coupled monolith services to a **Kafka-based event-driven architecture**, enabling reliable asynchronous processing and independent service scaling.
- Practised **TDD with JUnit and Mockito** achieving high test coverage and reducing post-deployment defects; maintained **CI/CD pipelines via GitHub Actions** automating build, test, and deployment for fast, reliable releases within Agile/Scrum sprints.

Web Developer

May 2023 – Oct 2023

Crescent Engineering and Consulting, Navi Mumbai

- Developed responsive, component-driven UIs using **React.js, HTML5, and CSS3**, integrated with backend REST APIs; improved frontend load performance by **~30%** through lazy loading and code splitting.
- Contributed to backend modules using **Spring Boot** – built REST endpoints, handled data validation, and worked with relational databases, laying the foundation for transition to the SDE backend role.
- Participated in **Git-based workflows** including branching, pull requests, and peer code reviews; collaborated with senior engineers to understand system architecture and translate client requirements into working features.

Key Projects

Tally Integration Plugin

Production — Crescent Engineering

- Built a production plugin integrating a **SaaS Billing module with Tally Prime** via Tally's XML/HTTP API; handled bi-directional sync of invoices, payments, and ledger entries with **retry logic, conflict resolution, and error recovery** to guarantee data consistency across both systems. Deployed to real clients, directly reducing manual accounting effort.

Distributed Notification System

github.com/Sahill1001/notification-system

- Built a multi-channel notification platform (email, SMS, in-app) using **Spring Boot, Kafka consumers, dead-letter queues, and Redis rate limiting**; supports fan-out to 10K+ users per event with retry and failure isolation.

Distributed Rate Limiter

github.com/Sahill1001/rate-limiter

- Implemented a distributed rate limiter using **Spring Boot and Redis (Token Bucket algorithm)** with atomic Lua scripting; handles **50K+ requests/minute** with cross-node consistency.

Distributed URL Shortener

github.com/Sahill1001/url-shortener

- Engineered a high-throughput URL shortener using **Spring Boot, PostgreSQL, Redis, and Kafka**; achieved **80% reduction in read latency** via cache-aside pattern and asynchronous analytics processing.

Education

University of Mumbai

2020 – 2023

Bachelor of Science in Computer Science

CGPA: 9.57 / 10

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management, Computer Networks, OOP, Software Engineering

Achievements & Highlights

- Promoted from **Web Developer to Backend SDE within 6 months** at Crescent Engineering – driven by strong delivery across both frontend and backend modules.
- Solved **300+ DSA problems** on [LeetCode](https://leetcode.com).
- Scored **9.57 / 10 CGPA** in BSc Computer Science from the University of Mumbai.
