

Sahilkumar Prasad

Java Backend Developer — Spring Boot — Microservices

Mumbai, India — +91-8451968851 — prasadsahil06@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#) — [LeetCode](#)

Professional Summary

Java Backend Developer with **3+ years of professional experience** building a **production B2B SaaS platform** on **Java and Spring Boot**. Progressed from Web Developer to Backend SDE within the same organisation in 6 months. Specialises in **scalable Spring Boot microservices**, multithreaded backends, and event-driven systems using **Kafka, Redis, and AWS**. Shipped features across complex multi-module systems and delivered a **production third-party integration adopted by real clients**. Strong foundations in **core Java, OOP, design patterns, TDD, system design (LLD/HLD), and Agile delivery**. Looking to bring backend depth and end-to-end ownership to a Java-driven engineering team.

Technical Skills

Languages: Java (8/11/17), JavaScript, SQL

Core Java: Collections, Streams, Lambdas, Multithreading & Concurrency, Exception Handling, Generics, JVM Fundamentals

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs

Architecture: Microservices, Event-Driven Architecture, Distributed Systems, OOP, Design Patterns, System Design (LLD/HLD)

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Messaging: Apache Kafka

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, GitHub Actions (CI/CD), Maven

Testing: JUnit, Mockito, Test-Driven Development (TDD)

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+)

Professional Experience

Software Development Engineer (Java Backend)

Nov 2023 – Present

Crescent Engineering and Consulting, Navi Mumbai — B2B SaaS ERP Platform

- Delivered backend features in **Java and Spring Boot** across **five core product modules** — Inventory, Billing, Purchase, Production, and Sales CRM — designing domain-driven service boundaries, shared Kafka event contracts, and transactional consistency across PostgreSQL for a multi-tenant SaaS platform.
- Designed and built a **production Tally integration plugin** in **Java/Spring Boot** connecting the platform's Billing module with **Tally Prime** via XML/HTTP API, enabling bi-directional sync of invoices, payments, and ledger entries; eliminated manual data entry for clients and directly contributed to product adoption.
- Reduced **API latency by 45%** by introducing Redis caching and **asynchronous processing with Spring's @Async and CompletableFuture**, directly improving SLA compliance and end-user experience.
- Improved **database query performance by 50%** through targeted indexing, JPQL/native query rewriting, JPA fetch strategy tuning, and HikariCP connection pool tuning across PostgreSQL and MySQL.
- Migrated tightly coupled monolith services to a **Kafka-based event-driven architecture** using Spring Kafka, enabling reliable asynchronous processing and independent service scaling.
- Applied **core Java concepts and design patterns** (Factory, Strategy, Builder, Singleton) and leveraged **Java Streams, Optional, and concurrency utilities** to write clean, maintainable service-layer code.
- Practised **TDD with JUnit 5 and Mockito** achieving high test coverage and reducing post-deployment defects; maintained **CI/CD pipelines via GitHub Actions** automating Maven build, test, and deployment for fast, reliable releases within Agile/Scrum sprints.

Web Developer

May 2023 – Oct 2023

Crescent Engineering and Consulting, Navi Mumbai

- Contributed to backend modules using **Java and Spring Boot** — built REST endpoints with Spring MVC, implemented validation and exception handling, and worked with Spring Data JPA against relational databases; laid the foundation for transition to the SDE backend role.
- Developed responsive, component-driven UIs using **React.js, HTML5, and CSS3**, integrated with Spring Boot REST APIs; improved frontend load performance by **~30%** through lazy loading and code splitting.

Key Projects

Tally Integration Plugin

Production — Crescent Engineering

- Built a production **Java/Spring Boot** plugin integrating a SaaS Billing module with **Tally Prime** via Tally's XML/HTTP API; handled bi-directional sync of invoices, payments, and ledger entries with **retry logic, conflict resolution, and error recovery** to guarantee data consistency across both systems. Deployed to real clients, directly reducing manual accounting effort.

Distributed Notification System

github.com/Sahill1001/notification-system

- Built a multi-channel notification platform (email, SMS, in-app) using **Java, Spring Boot, Kafka consumers, dead-letter queues, and Redis rate limiting**; supports fan-out to 10K+ users per event with retry and failure isolation.

Distributed Rate Limiter

github.com/Sahill1001/rate-limiter

- Implemented a distributed rate limiter in **Java/Spring Boot** using **Redis (Token Bucket algorithm)** with atomic Lua scripting; handles **50K+ requests/minute** with cross-node consistency.

Distributed URL Shortener

github.com/Sahill1001/url-shortener

- Engineered a high-throughput URL shortener using **Java, Spring Boot, PostgreSQL, Redis, and Kafka**; achieved **80% reduction in read latency** via cache-aside pattern and asynchronous analytics processing.

Education

University of Mumbai

2020 – 2023

Bachelor of Science in Computer Science

CGPA: 9.57 / 10

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management, Computer Networks, OOP, Software Engineering

Achievements & Highlights

- Promoted from **Web Developer to Backend SDE within 6 months** at Crescent Engineering – driven by strong delivery across Java backend and frontend modules.
- Solved **300+ DSA problems** on [LeetCode](https://leetcode.com/) (primarily in Java).
- Scored **9.57 / 10 CGPA** in BSc Computer Science from the University of Mumbai.
